## PROJECTS

**Laguz**
E-commerce project using Node.js, Express.js and MySQL with Sequelize. The frontend was built with HTML, CSS and EJS, and a simple dashboard was created in React. Additionally, APIs were developed for communication between the frontend and the backend, ensuring a fluid user experience.

**Bogota Metro**
Simple project about the Bogota metro by creating a responsive website using HTML, CSS, and JavaScript. The implementation of CSS and JavaScript allowed the website to be visually appealing and functional on a variety of devices.

**Horizontal property**
Website with a simple frontend using HTML, CSS and JavaScript, which interacted with a database created in PostgreSQL. The integration with the database allowed to manage and present the information efficiently.
